

# FLUINNATE 3rd meeting, Scientific Program

Thursday, January 22, 2009

- 10:00-10:15 *Opening Remarks*  
**Otto Haller**, FLUINNATE Coordinator
- 10:15-11:45 *Keynote Lectures*
- 10:15-11:00 **Stephan Ludwig**  
The role of NF-kappaB in influenza virus infected cells
- 11:00-11:45 **Stephen Cusack**  
Structure and function of three domains of the PB2 subunit of influenza A virus polymerase
- 11:45-12 :00 *Coffey break*
- 12 :00-18:15 *Progress report of Partners*
- 12 :00-12:45 **FLUINNATE work package I**  
**Otto Haller**, Coordinator  
« Molecular basis of influenza virus virulence in mice with a functional Mx1 resistance gene »
  - Presentation of the running project (Iris Körner ; Petra Zimmermann ; Daniela Kugel)
  - Networking discussion about the milestones/deliverables
  - Planned contribution by other FLUINNATE partners
- 12:45-14:00 *Lunch*
- 14:00-14:45 **FLUINNATE work package II**  
**Mikhail Matrosovich**, Coordinator  
« Receptor specificity and innate immunity »
  - Presentation of the running project
  - Networking discussion about the milestones/deliverables
  - Planned contribution by other FLUINNATE partners
- 14:45-15:30 **FLUINNATE work package III**  
**Ervin Fodor**, Coordinator  
« Interactions of the influenza virus RNA polymerase with host factors »
  - Presentation of the running project
  - Networking discussion about the milestones/deliverables
  - Planned contribution by other FLUINNATE partners

- 15:30-16:15 **FLUINNATE work package IV**  
**Nadia Naffakh**, Coordinator  
« Identification of cellular factors interacting with the polymerase complex of influenza A viruses »
- Presentation of the running project
  - Networking discussion about the milestones/deliverables
  - Planned contribution by other FLUINNATE partners
- 16:15-16:45 *Coffee Break*
- 16:45-17:30 **FLUINNATE work package V**  
**Kristien van Reth**, Coordinator  
« Role of interferon (IFN) in the pathogenesis of avian influenza viruses »
- Presentation of the running project
  - Networking discussion about the milestones/deliverables
  - Planned contribution by other FLUINNATE partners
- 17:30-18:15 **FLUINNATE work package VI**  
**Barbara Botazzi**, Coordinator  
« Role of PTX3 and other components of innate immunity in influenza virus infection »
- Presentation of the running project
  - Networking discussion about the milestones/deliverables
  - Planned contribution by other FLUINNATE partners
- 20:00 *Dinner*

## Friday, January 23, 2009

- 9:00-9:45 **FLUINNATE work package VII**  
**Bing Sun**, Coordinator  
« The pathogenicity of RNA polymerase and NS1 suppression of IFN $\alpha$ / $\beta$  production in different strains of avian flu viruses in China »
  - Presentation of the running project
  - Networking discussion about the milestones/deliverables
  - Planned contribution by other FLUINNATE partners
- 9:45-10:15 **FLUINNATE work package VIII**  
**Aldo Tagliabue**, ALTA  
« Project Management »
- 10:15-11 :00 *General Discussion*
  - Consortium agreement (reporting times, financial & administrative matters)
  - Others..
- 11:00-11:15 *Coffee Break*
- 11:15-12:30 *Open Time for discussion*
- 12:00-12:30 *Concluding Remarks*  
**Otto Haller**, FLUINNATE Coordinator
- 12:30 *Lunch*
